- Other: 4%

DIAGNOSIS:
- Intellectual Disability: 42%
  - Intellectual disability is a term used when there are limits to a person’s ability to learn at an expected level and function in daily life.
- Autism: 34%
  - A group of complex disorders of brain development which are characterized, in varying degrees, by difficulties in social interaction, verbal and nonverbal communication, and repetitive behaviors.
- Epilepsy: 12%
  - A spectrum condition with a wide range of seizure types and control varying from person-to-person.
- Cerebral Palsy: 7%
  - A group of disorders—usually caused by problems with brain development or by a brain injury—that impair the ability to move and maintain balance and posture.
- Other: 5%

Working to Keep the Promise

1. Provide market-based allocations for rent
2. Reinstate social recreation (and non research-based support therapies) family program services
3. Support the development of a long term plan to address programmatic and operational challenges to sustain the regional center system.
4. Revamp service rates to ensure long term system viability and sustainability
5. Identify community-based resources (housing, physicians and clinicians) to address unmet needs of consumers and families
