Purpose

To provide information to community partners who are interested in becoming a “vendored” service provider.

Service providers are “vendored” by the Regional Center in whose catchment area the service is located, known as the “vendoring” regional center. The “vendoring” regional center is responsible for ensuring that the applicant meets licensing and Title 17 requirements for vendorization, determining the appropriate vendor category for the service to be provided, and approving or disapproving vendorization based upon their review of the documentation submitted by the applicant.

What Is Vendorization?

Vendorization is a process within the Regional Center system for identification, selection, and utilization of service providers **based on the qualifications and other requirements necessary** in order to provide the services for the people Regional Center serve.

The “vendorization” process allows regional centers to verify, prior to the provision of services to consumers, that an applicant meets all of the requirements and standards specified in regulations prior to the provision of services to individuals. Applicants who meet the specified requirements and standards are assigned a service code and an unique vendor identification number.
